

The largest, wealthiest corporations have gained unprecedented power and influence in contemporary life. From cradle to grave the decisions made by these entities have an enormous impact on how we live and work, what we eat, our physical and psychological health, what we know or believe, whom we elect, and how we deal with one another and with the natural world around us. At the same time, government seems ever more subservient to the power of these oligopolies, providing numerous forms of corporate welfare tax breaks, subsidies, guarantees, and bailouts while neglecting the most basic needs of the population. In *Corporate Power, Oligopolies, and the Crisis of the State*, Luis Suarez-Villa employs a multidisciplinary perspective to provide unprecedented documentation of a growing crisis of governance, marked by a massive transfer of risk from the private sector to the state, skyrocketing debt, great inequality and economic insecurity, along with an alignment of the interests of politicians and a new, minuscule but immensely wealthy and influential corporate elite. Thanks to this dysfunctional environment, Suarez-Villa argues, stagnation and a vanishing public trust have become the hallmarks of our time.
